Additional Information

When looking for a combination of security and airflow, there is no need to look any further than a louvered or fully-louvered steel door. These door systems are able to provide top level security without the compromise of windows or wide openings thanks to their durable construction.

Louvres are available in a range of sizes and airflows, so if you have a specific requirement contact us and we will be able to help.

The Build

Door leaves are made from various gauges of steel depending on your application. We stock 18swg, 16swg, and 14swg Steel leaves as standard. Doors are honeycomb filled as standard but insulated options are available.

Door Frames are provided, and are made as single rebate profiles as standard, double rebate and uneven-fit options are available on request.

Maximum sizes

The largest sizes we make steel doors to are as follows:

Single Leaf - 1425mmW x 2945mmH

Double Leaf - 28285mmW x 2945mmH

Benefits of Louvered Steel Doors

There are numerous reasons and benefits to choosing louvre panels for your steel door, some of the reasons our customers use them for are:

- Excellent ventilation
- Stylish construction
- Can be installed with anti-vermin mesh
- Highly secure
- Any steel door we offer can be made with louvre panels

Typical Applications:

- Refuse/Bin Stores
- Power Sub-stations
- Car Park Pedestrian Access
- Plant Rooms
- Gas Storage

If you have a requirement that you don't see listed above, we can still help. Get in touch with our friendly sales team to discuss your requirements.
