## Additional Information

### Why Hormann Industrial Shutters?

If your business demands uncompromising quality and nothing less than the absolute best in roller shutter technology then you will need a Hormann Roller Shutter.

Built to world-leading standards in Germany, Hormann Doors are widely acknowledged as the industry front runners in roller shutters and garage doors.

S&S Shutters are an officially recognised installation partner with Hormann Doors, meaning we are trusted to make sure their shutters and garage doors are installed to the absolute highest levels of quality.

Hormann shutters are available in a range of colour options and styles. If you are looking for shutters, sliding doors, or panoramic shutters, speak to our sales team today to create a specification.

### What Options Are Available?

All Hormann Garage Doors are built bespoke to your exact requirements.

During a site survey, our engineers will discuss available options including colours, profiles, operation, and anything else you require.

You can choose from a wide range of steel, aluminium, and PVC shutters. The technology that makes these doors work is industry leading and backed by 50 years of innovation.

### Are Acoustic/Fire/High Security options available?

We offer one of the widest ranges of high quality security shutters seen on the market. Hormann Garage doors are generally not suitable for fire protection or high security applications, but we offer a number of products that will be suitable for your needs.

Operation is available through electric tubular motor, or a counter balance spring for manual use. All electrically operated roller shutters can be fitted with any one of a variety of control options such as key switch, push buttons, remote control, keypad, and many more.

Speak to our experienced team for advice on which is best for your application.
